RRN:

A complex and persistent
information
manipulation campaign

Technical report

19 July 2023

MARCH 2022: RRN, A KEY COMPONENT OF THE CAMPAIGN

The detected campaign is centred around the media *RRN*, created a few days after Russia invaded Ukraine.

RRN, an online media outlet linked to Russian websites

Creation of the *RRN* website

On 10 March 2022, the domain name *rrussiannews[.]com*¹ (*Reliable Russian News*) was registered in Russia. *RRN* presents itself as an independent media outlet publishing “fact-checked information” mainly concerning the war in Ukraine.

Available in several languages², probably thanks to an automated translation software, *RRN* has developed an editorial line based on four main themes: (1) The alleged ineffectiveness of sanctions targeting Russia, which would above all negatively impact European States and/or their citizens; (2) The alleged Russophobia of Western States; (3) The barbaric acts allegedly committed by Ukrainian Armed Forces, and the neo-Nazi ideology that would predominate among Ukrainian leaders; (4) The negative effects on European States that would allegedly be generated by the hosting of Ukrainian refugees.

Since 15 March 2022, at least seven official *Facebook* pages of the Russian diplomatic network have shared URLs leading to the *RRN* website. This is notably the case of the Russian embassies in Bangladesh, Malaysia and Slovakia (see [Annex 1](#))³.

Three months after its creation, *RRN* administrators sought to dissimulate their links with Russia by changing the name of the media, which then became *Reliable Recent News*. On 6 June 2022, the domain name *rrn[.]world* was registered, and *rrussiannews[.]com* was set up to redirect traffic to the new domain name. However, Cyrillic characters continued to appear in certain articles published on *rrn[.]world*.

Article published by *RRN*
(source: *rrn[.]world*)

Traffic redirect from *rrussiannews[.]com* to *rrn[.]world* (source : [urlscan.io](#))

Cyrillic characters in an article of *RRN* media (source: *rrn[.]world*)

Links between *RRN* and the pro-Russian *War on Fakes* fact-checking platform

The first articles published on *RRN* website were identical copies of articles previously published on the fake Russian fact-checking website *War on Fakes*, launched a few hours after Russia invaded Ukraine.⁴

¹ Regarding the malicious nature of the actors responsible for the *RRN* campaign, domain names and URLs in this report have been demilitarized. VIGINUM advise taking all the precautions of use when accessing these resources.

² French, English, German, Italian, Chinese, Spanish, Arabic.

³ Source : *Crowdtangle*.

⁴ *War on Fakes* is a fake fact-checking website publishing in multiple languages used by Russia to deny the accusations that Russia has committed war crimes since it invaded Ukraine.

Quickly identified for its role in legitimising the Russian “special military operation” and discrediting the Ukrainian State, *War on Fakes* has also been amplified by at least 65 official Facebook pages and 24 official Twitter accounts of the Russian diplomatic network (see [Annex 2](#)). Moreover, *War on Fakes* the administrator’s login page has been set up to redirect traffic to *rrussiannews[.]com*, thereby establishing a technical link between the two websites.

The domain name *waronfakes[.]com* was registered on 1 March 2022 and was updated a year later by Timofey VASILIEV,⁵ a Russian citizen known for having worked for ANO Dialog⁶. Dialog is an organization created in 2019 under the supervision of the Russian Presidential Administration and the Department of Information Technologies of Moscow city. In charge of a portion of the public relations and communication strategy of Moscow, ANO Dialog has been accused of conducting online propaganda activities on behalf of the Russian State⁷.

Meta’s attribution of the campaign to two Russian companies

On 15 December 2022, Meta publicly attributed the RRN campaign to two Russian companies⁸: “Structura National Technologies” (*Struktura*)⁹ and “Social Design Agency” (*Agentstvo Sotsialnogo Proektirovaniya*)¹⁰.

Created in 2009, *Struktura* is a company specialised in the development of IT tools. With more than 500 declared “experts and specialists” and five branches (in Moscow, Saint Petersburg, Smolensk, Nizhny Novgorod and Krasnoyarsk), *Struktura* counts several Russian government institutions among its clients, such as the Russian Ministry of Internal Affairs (MVD), the Government of Moscow city, and the State Duma of the Federal Assembly (lower chamber of the Federal Assembly of Russia)¹¹. On its website, now offline, *Struktura* proposed some 40 IT products, including 13 that were explicitly labelled as being developed for the Russian State. The company has notably designed a solution for “monitoring and analysing the informational space”, an “information security” solution and a product called “Information Security Portal for DIT”, an abbreviation of the Department of Information Technologies of Moscow, under whose supervision ANO Dialog was created.

Founded in 2017, ASP is a digital marketing company located in Moscow, notably working in “films and video production and editing” and in websites’ translation and creation. On the 24 clients’ list declared on the ASP website, 21 are also clients of *Struktura*, including Russian governmental institutions.

List of ASP and Struktura clients (source: sp-agency[.]ru et structura[.]pro)

In addition to their customer's list, *Struktura* and ASP are run by the same director, Ilya Andreevich GAMBASHIDZE,¹² a famous "political technologist" (*polittekholog*) and former assistant to the Prefect of the Northern Administrative District of Moscow, Oleg MITVOL. After studying Sociology and Political Science, and specializing in Political and Electoral Systems in local governments,¹³ Ilya GAMBASHIDZE was adviser to Pyotr TOLSTOY, Deputy Speaker of the State Duma, whom he accompanied to a summit of the Council of Europe in 2017.¹⁴

JUNE–SEPTEMBER 2022: INCREASING NUMBER OF MANOEUVRES

avisindependent[.]eu, a fake media outlet analysing the war in Ukraine

Creation of the *avisindependent[.]eu* website

In June 2022, VIGINUM identified a now-offline website affiliated with the *RRN* campaign, called *La France indépendante*, registered on 1 June 2022 under the domain name *avisindependent[.]eu*.

Presenting itself as a media outlet publishing "news and analyses on the war in Ukraine", *avisindependent[.]eu* published content replicating narratives often employed by Russia such as the Eastern expansion of NATO seen as a threat to Russian interests or the alleged desire of Western States to erase Russian culture.

Archive of *La France indépendante* main page (source : *avisindependent[.]eu*)

Whois data for *avisindependent[.]eu* (source : *eurid.eu*)

¹² Илья Андреевич ГАМБАШИДЗЕ. Tax identification number: 771401746465.

¹⁴ <https://assembly.coe.int/LifeRay/APCE/pdf/SCs/2017/AS-PER-2017-PV-01-EN.pdf>.

The Russia-hosted website *avisindependent[.]eu*, was registered by the company *NetBuzz*. The email address *netbuzzproduction@gmail[.]com* redirects towards the VK and *Instagram* accounts of Mikhail Andreevich CHEKOMASOV,¹⁵ co-founder of *Hustle Media*¹⁶ (ООО ХАСЛ МЕДИА), a company specialised in managing influencers on social media and blogs.

The phone number contact of *Hustle Media* was registered under the name “Micha Netbus”. Micha is short for Mikhail, which corroborates the hypothesis according to which Mikhail CHEKOMASOV would have registered the domain name of *La France Indépendante*. In addition, a photo of a conference access badge published on the VK account of Mikhail Andreevich CHEKOMASOV is further evidence of his ties to Netbuzz.¹⁷

Pass in the name of Mikhail Chekomasov (source: vk.com)

In 2012, Mikhail CHEKOMASOV founded the company *Palmira Trade*¹⁸ (ООО ПАЛЬМИРА ТРЕЙД) together with Kirill Vitalievich KALASHNIKOV, who is also the head of the influencer management company *Lideri Mnenii* (ООО ЛИДЕРЫ МНЕНИЙ). This company, also known under the name *IPTeam* or *Veul*,¹⁹ has already been identified by the French news magazine *Marianne*²⁰ for having tried to contact French influencers in order to ask them to publish pro-Russia content in the context of the war in Ukraine. Mikhail CHEKOMASOV is presented on the company’s website as a member of *IPTeam*’s management, just like Anton K. ERLBAUM, cofounder of *Hustle Media*, and Deputy Director of *IPTeam*.

Location of the companies Hustle Media and IPTeam (sources: hmd[.]jone and ip[.]team)

In addition, the companies *Hustle Media* and *Lideri Mneniy/IPTeam/Veul* are located in the same buildings in Russia and in China.

Fake accounts posting pro-Russia and anti-Western satirical cartoons

To increase the visibility of *avisindependent[.]eu*, several social media accounts were created, mainly on *Facebook* and *Twitter*. In addition to reposting links to *La France Indépendante* website and to *rrn[.]world*, these accounts posted pro-Russian, anti-Western and anti-Ukrainian satirical cartoons.

One of the main accounts was called Milana KRYSTEL, a fictional person presented as a French citizen who opposed the war in Ukraine. Created on 21 June 2022, this avatar, mentioned by several accounts within the *RRN* campaign scheme, is at the origin of a petition entitled “No Weapons in Ukraine” published on *change.org*.

The cartoons posted on these social media accounts and on *avisindependent[.]eu* came from two main sources: *memhouse[.]online* and the Telegram channel @VoxCartoons.

Information found on *memhouse[.]online*

Instagram account associated with the RRN campaign (source: *instagram.com*)

Cartoons and memes found on the *memhouse[.]online* website (source: *memhouse[.]online*)

Created on 15 April 2022, *memhouse[.]online* presents itself as an image bank, sharing cartoons mainly about the war in Ukraine. Several cartoons published on accounts affiliated with the RRN campaign seemed to have come from this website.

According to data from *reg.ru*,²¹ the domain *memhouse[.]online*, which has since been removed, was registered by a Russian national living in Moscow, Andrey SHUBOCHKIN.

²¹ Reg.ru is a Russian company that registers domain names, and in particular is responsible for registering .ru and .рф. domain names.

Information found on the Telegram channel @VoxCartoons

One of the main sources of cartoons published during the RRN campaign is the Telegram channel @VoxCartoons. Created on 2 April 2022, this channel publishes satirical cartoons mocking certain European leaders, accused of being used by the United States in their management of the conflict in Ukraine.

Satirical cartoons published on the @VoxCartoons channel had also been relayed by the Russian diplomatic network, especially on the Twitter account of the Embassy of Russia in France on 23 March 2022. It is important to note that this happened one week before the Telegram channel @VoxCartoons was created.

Cartoons of @VoxCartoons published on the Twitter account of the Embassy of Russia in France (source: twitter.com)

Creation of websites accusing Ukraine and Western States of war crimes

truemaps[.]info, a website listing the children killed in the Donbas region

rrn[.]world and several social media accounts affiliated with the RRN campaign published links to *truemaps[.]info*. Created on 30 June 2022, this website shows an interactive map representing all the countries providing arms to Ukraine, including France, as well as a list of children who have allegedly been killed in the Donbas region because of the delivery of these weapons.

truemaps[.]info website (source: *truemaps[.]info*)

Cyrillic characters "М" in the source code (source: *truemaps[.]info*)

An examination of the source code of the *truemaps[.]info* revealed the presence of Cyrillic characters, suggesting the involvement of Russian speaking actors in its design.

tribunalukraine[.]info, a website on "the war crimes committed by the Ukrainian armed forces"

Registered on 5 October 2022, *tribunalukraine[.]info* presents itself as a website aiming to restore "the truth that the media are hiding from us". It publishes articles and videos in five languages²² on the alleged "war crimes" committed by "Nazis in power" in Ukraine. According to the accounts sharing the URLs towards *tribunalukraine[.]info*, the website would be administrated by Germans.

²² German, English, Spanish, French and Russian.

“Open Opinion” Facebook accounts: the first cases of typosquatting

“Single-use” accounts

During May 2022, the RRN campaign was behind the creation of a group of Facebook accounts targeting French, German, Italian, Lithuanian, British and Ukrainian audiences.

Mainly called “Open Opinion”²³, these accounts used profile pictures that were either taken from a German media logo or from images generated by artificial intelligence. These accounts were “single-use” accounts (or burner accounts) used for one unique post.

In addition to posting cartoons from @VoxCartoons, the “Open Opinion” accounts shared, via sponsored content, links to articles published on the RRN media website, the petition created by Milana KRYSTEL, as well as typosquatted domain names²⁴ of European national media outlets, including the French media 20 Minutes.

Containing many spelling errors and incorrect syntax, as well as outrageous language, the typosquatted websites analysed by VIGINUM were used to disseminate manifestly inaccurate or misleading content in favour of Russian interests. Some of these articles were directly taken from RRN.

²³<https://medium.com/dfrlab/russia-based-facebook-operation-targeted-europe-with-anti-ukraine-messaging-389e32324d4b> ; <https://www.disinfo.eu/wp-content/uploads/2022/09/Doppelganger-1.pdf>.

²⁴ “Typosquatting” is a technique consisting in registering domain names with deliberately misspelled names of well-known websites to deceive users.

Use of a first network of bots

The *RRN* campaign has also used bots on *Facebook*, which disseminated *URLs* of typosquatted articles in comments sections of *Facebook* pages of legitimate European media outlets. The *Facebook* page of the German-speaking Turkish media outlet, *TRT Deutsch*, was also targeted in this manner. The accounts involved had British-sounding names and used profile pictures mainly taken from *VK* accounts of Russian nationals.

Account sharing links to typosquatted websites
(source: facebook.com)

Sharing a link to a typosquatted website (source: facebook.com)

The use of bots generated operational security errors. Thus, some bots published links comprising two different parts: in green, a *URL* redirecting to a fake article from *Bild*; in red, a *URL* redirecting to a *Yandex* cloud using *R7-Office* software²⁵ in which "veul_sas" is mentioned, which could refer to the company *Lidery Mnenii/IPTeam/Veul* whose management team includes Mikhail CHEKOMASOV.

Increased use of social media and sponsored posts

11

Pursuance of media typosquatting

Since February 2023, VIGINUM has noticed an increasing number of impersonations of major French and foreign media outlets³², in order to publish pro-Russian articles linked to the war in Ukraine (see [Annex 3](#)).

The appearance of typosquatted websites is in every way similar to that of the media outlets they are impersonating, the only difference being the visited *URL*. The domain names of typosquatted media outlets use the same source code as that of legitimate media outlets: most of the links on the legitimate website are downloaded on the typosquatted website, which lends it credibility in the eyes of unsuspecting users.

To date, VIGINUM has identified four French media outlets that have been imitated: *Le Parisien*, *Le Monde*, *Le Figaro* and *20 Minutes*³³. For the most part not indexed by search engines, the articles hosted on these typosquatted websites can only be accessed from the *URLs* in the sponsored content posted on *Facebook* and *Twitter*. The investigations conducted by VIGINUM pointed to the existence of at least 49 fake articles in *Le Parisien*, seven in *20 Minutes*, one in *Le Monde* and one in *Le Figaro*, which was the last media outlet whose identity was impersonated as of 8 June 2023.

Article published on the typosquatted version of *Le Parisien* (source: [leparisien\[.\]ltd](#))

Impersonation of government websites

Since 29 May 2023, the *RRN* campaign has been using the typosquatting technique to impersonate French and German government websites in order to publish manifestly inaccurate or misleading content. The identity of the website of the Ministry for Europe and Foreign Affairs was imitated and used to publish a fake communiqué stating that a new security tax had been allegedly introduced on a large portion of French financial transactions to fund support for Ukraine.

Typosquatted website of the French Ministry for Europe and Foreign Affairs (source: [diplomatie\[.\]gouv\[.\]fm](#))

Sponsored content redirecting to a fake Ministry for Europe and Foreign Affairs website (source: [facebook.com](#))

The same operation was observed on the website of Germany's Ministry of the Interior, with the publication of a fake press release on the alleged obligation for German households to host Ukrainian refugees.

³² Germany, United Arab Emirates, United States, Israel, Latvia, Lithuania, United Kingdom, Ukraine.

ukraine-inc[.]info homepage

the server associated with *ukraine-inc[.]info* is hosted in Russia.

Created on 11 March 2023, *ukraine-inc[.]info* is a website hosting a series of cartoons called “Ukraine Cocaine” targeting Volodymyr ZELENSKY. The Ukrainian President is presented as a cocaine addict manipulated by a freemason network, and constantly asking Western States for money to enrich himself. According to different accounts and websites publishing these videos, the videos were allegedly made by French nationals.³⁴ Furthermore,

Facebook post of the Russian House in Kathmandu (source: facebook.com)

Posted on 11 March 2023 by the RRN official *Telegram* channel, @reliablerecentnews, the anti-Zelensky cartoon went viral on a massive scale on 12 March 2023, when it has been published by @readovkanews, the eighth most followed channel in Russia with 1.68 million subscribers. It has been viewed more than 891,000 times.³⁵ Afterwards, more than 30 other high-audience *Telegram* channels have also published the video on the morning of 12 March, particularly channels of the public media outlet *Ukraina.ru*³⁶ or the FSB-linked media *NewsFront*³⁷. On *Facebook*, it was notably posted on the official pages of at least nine Russian Houses (Русский дом), institutions affiliated with the Rossotrudnichestvo agency of the Russian Ministry of Foreign Affairs.³⁸

In addition to being the destination of the URLs published in the sponsored content on *Facebook*, *ukraine-inc[.]info* shares technical similarities with *tribunalukraine[.]info*. The host servers of these two websites were configured in a similar way, leaving open port 3000 dedicated to the development of websites before putting them online.

Server hosting the ukraine-inc[.]info website (source: onyphe.io)

³⁴ As a reminder, in August 2022, another cartoon series called “Stop Nazi Games” was attributed notably by the Russian diplomatic network to a French animation studio called “Barracudas”. In this cartoon series, the Ukrainian President, pictured as a puppet being controlled by a secret society, was sending his troops to attack the Donbas region and the blood of the victims was turned into gold.

³⁵ <https://t.me/readovkanews/54519/>.

³⁶ *Ukraina.ru* is part of the Russian public media outlet Rossiya Segodnya holding, which also owns the *Sputnik News* agency and the press agency RIA Novosti.

³⁷ https://t.me/ukraina_ru/137086, <https://t.me/SolovievLive/163610>, <https://t.me/newsfrontnotes/34506>. Other channels include @intelslava, @golosmordora, @svezhesti, @denazi_UA, @golosmordora, @nevesausrussland and @OstashkoNews.

³⁸ The Russian Houses implicated include those of Ankara, Alexandria, Dar es Salaam, Kathmandu, Cairo, Mumbai, Ulaanbaatar, Rabat and Tel Aviv.

Creation of fake French-language news websites

On 24 February 2023, a year to the day after Russia invaded Ukraine, five websites presented as media outlets with news in French were registered and hosted on the same server. Using French-sounding names (*La Virgule*, *Allons-y* and *Notre Pays*), these websites publish news articles on French and European internal politics, in which they criticize the French government, particularly its handling of the pension reform. In the meantime, they include Russia's recurrent talking points criticizing the effects of sanctions imposed by the European Union against Russia or the alleged bias of Western media outlets, accused of spreading false information to the detriment of Moscow.

Websites covering French news associated with the RRN campaign

Several elements make it possible to link these five websites to the RRN campaign. *La Virgule* was indeed the primary broadcaster of the first episode of "Ukraine Cocaine". In an article entitled "Zelensky is on drugs", *La Virgule* stated for the first time that the creators of the cartoon series were French. The content of this article was replicated in sponsored posts on Facebook. In addition, *La Virgule* was mentioned for the first time by RRN website, before it was even indexed by search engines. Moreover, certain articles of *La Virgule* shared URLs to *franceetueu[.]today*, created on 24 February 2023 and hosted on the same server as *lavirgule[.]news*.

Article posted on "La Virgule"
(source: lavirgule[.]news)

One of the authors of the *La Virgule* article uses the pseudonym "nochemiamisanta", also used on the *allons-y[.]social* website. In the URL of certain articles published by *Allons-y*, there are the words "privet-mir", which can be translated from Russian as "hello world".

Mention of "nochemiamisanta" on La Virgule
(source : lavirgule[.]news)

Mention of "nochemiamisanta" on *allons-y[.]social*
(source : dzen.ru)

Several articles published on *Allons-y* also contain Cyrillic characters, which is probably the result of a bad automatic translation from Russian to French.

Cyrillic characters can be seen in an *Allons-y* article (source: *allons-y[.]social*)

The analysis of websites hosted on the same server as *lavirgule[.]news* enabled the detection of two similar websites, also targeting a French-speaking audience: *notrepays[.]today* and *candidat[.]news*. Lastly, the configuration of error messages on *allons-y[.]today* and *candidat[.]news* reveals that they were very likely designed by Russian or Russian-speaking individuals.
